WE ARE DELIGHTED TO INVITE YOU TO PARTICIPATE IN THE 2024 (ISOEN) IEEE INTERNATIONAL SYMPOSIUM ON OLFACTION AND ELECTRONIC NOSE

ISOEN 2024 provides a forum for scientists, engineers and practitioners to share their latest findings, innovations and products in the area of artificial chemoreception (olfaction and taste)

Now in its Twentieth edition, ISOEN 2024 will place special emphasis on sensing hardware and algorithms for reliable sensor operation for mobile, wearable, and distributed sensors for IoT and Industrial Internet

ISOEN ATTRACTS CONTRIBUTIONS FROM FIELDS AS DIVERSE AS:

- » Odor sampling: headspace analysis, dynamic sampling, pre-concentration and storage
- » New detection principles and materials for sensors for gases, odors and liquids
- » Sensors with multiple responses (known as multivariable or multiparameter sensors, virtual sensor arrays)
- » Odor and taste analysis devices, including Electronic Noses, Electronic Tongues
- » New data analytics (machine learning) for immunity to interferences, improved stability of baseline and sensitivity
- » Applications: medical, industrial, environmental, air quality, and food safety
- » IoT and robotic systems with chemical and biological sensors
- » Odor and gustatory perception and olfactory display
- » Bioengineering: cell-based olfactory sensors, receptor-based sensors, bio-inspired algorithms

As the world's premiere technical conference in artificial chemoreception, ISOEN 2024 will bring approximately 200 participants from academic, research and corporate organizations.

The exhibition will be closely integrated with the technical program through tutorials, plenary sessions, sensor and sensor systems demonstrations and social activities for delegates and exhibitors alike.

Benefits of your support...

- » High qualified visibility;
- » Improved brand awareness in a recognized event;
- » Promotion of your products/services to a motivated and qualified audience;
- » Networking and business contacts!
